

US 1 Bridge Update - February

Updates on the construction of the US 1 Jupiter Bridge

Attached please find the March Monthly Progress Report (MPR) along with some recent photos; this project is currently at 56% completion. Last weekend, crews successfully placed 2000 cubic yards of concrete for the Pier 5 (northernmost) footer!

Please join us for Coffee with the Contractor on Tuesday, March 26 at Perk Coffee House in Tequesta. The informational flyer is attached. Please feel free to stop by anytime between 10 a.m. and 11:30 a.m. to obtain a construction update and ask the project team any specific or general questions you may have.

The 90-foot United States Coast Guard-delineated channel is open to boaters throughout construction.

Additional information is available on the project page:

https://www.d4fdot.com/pbfdot/us_1_bridge_replacement_project.asp.

You can also follow along with construction progress via FDOT District 4's [Instagram](#), [X](#), and [Facebook](#) accounts.
