The Colony Garden Club has published "A Colony Garden Club [Guide to Florida-Friendly Landscaping, Best Practices for a Greener Jupiter Inlet Colony](#)". This is a must-read! A special thanks goes out to Leanna Landsmann for her hard work on the Guide.

Introducing a Guide to a Greener JIC

January 19, 2016 - With the coming infrastructure project, Mayor Comerford and the JIC Commission have set a goal: to make JIC the Greenest Town in Florida. The Colony Garden Club supports this goal with the publication of a practical guide for residents and landscape providers. The Colony Garden Club Guide to Florida-Friendly Landscaping™ outlines nine important principles "that when put into practice can safeguard our waters, protect your health and save you money," says Mayor Dan Comerford. "I encourage all residents to become familiar with these science-based practices from the University of Florida and I salute the Garden Club for leading this important initiative."
